Cf
10 1. A title input device for a recording medium,
comprising:
receiving means for receiving text broadcasting and
outputting received text information;
15 display means for displaying the received text
information output from said receiving means;
capturing means for storing the received text
information in capturing storage means when capturing
instruction operation means instructs to capture the
received text information;
20 selection operation means for selecting a title input
target unit of the recording medium;
call operation means for instructing to call desired
received text information from said capturing storage
means; and
25 title name recording means for reading the desired
received text information instructed to be called by said
call operation means from the received text information
stored in said capturing storage means and recording the

desired received text information in the recording medium
as a title name of the title input target unit selected by
said selection operation means, in response to operations
of said call operation means and said selection operation
means.

5

2. A title input device for a recording medium according
to claim 1, wherein said capturing means deletes redundant
text information when said capturing means stores the
received text information in said capturing storage means
when said capturing instruction operation means instructs
to capture the received text information.

10

3. A title input device for a recording medium according
to claim 1, wherein said title name recording means deletes
redundant text information when said title name recording
means reads the desired received text information
instructed to be called by said call operation means from
the received text information stored in said capturing
storage means and records the desired received text
information in the recording medium as a title name of the
title input target unit selected by said selection
operation means.

4. A title input device for a recording medium,

09464020
09464020
09464020

~~comprising:~~

~~receiving means for receiving text broadcasting and
outputting received text information;~~

5 ~~display means for displaying the received text
information output from said receiving means;~~

~~capturing means for storing the received text
information in capturing storage means when capturing
instruction operation means instructs to capture the
received text information;~~

10 ~~input operation means for selecting a title input
target unit of the recording medium and inputting a title
name character;~~

15 ~~title name storing means for storing a title name
input by a user in correspondence to each title input
target unit;~~

~~call operation means for instructing to call desired
received text information from said capturing storage
means;~~

20 ~~title name input processing means for writing a title
name character input by the user in said title name storage
means in correspondence to the title input target unit
desired by the user, reading the desired text information
stored in said capturing storage means when said call
operation means instructs to call the desired received text
information, and writing the title name in said title name~~
